## Article 1 — Accessibility statement

**1.1** Target: WCAG 2.2 level AA. This is a design target, not a certified conformance: no independent audit has been carried out yet.

## Article 2 — What was done

**2.1**
- Semantic HTML, one main heading per page, a link to skip to the content.
- Every function is usable with the keyboard; focus is always visible.
- Status is never shown by colour alone; it always has a text label.
- The 3D view has a 2D projection and a table with the same numbers; motion is stopped when your system asks for reduced motion.
- Pages reflow on small screens and zoom to 200%.

## Article 3 — Known limits

**3.1**
- The 3D view itself cannot be explored with a screen reader; use the table tab, which contains every value.
- Some technical package descriptions use specialist terms.

**3.2** To report a barrier: Info.and.News.S.T.A.R@proton.me (subject `ACCESSIBILITY`).
