1. Identity

Document	STAR-PKG-STAR-GEODESY-EN · v2.2 · 2026-11-02
Package	star-geodesy
Version	0.1.1
Capability	star.geodesy.ecef
Maturity	Beta (VERIFIED)
Python	⩾3.9
Source commit	dc09f61
Source	https://github.com/Andrea07072000/S.T.A.R.-/tree/main/packages/star_geodesy

2. Licence and obligations

Apache License 2.0. You may use, copy, modify and distribute it, also commercially, and you receive a patent licence from the contributors. When you redistribute it: keep the LICENSE file and the copyright notices (and a NOTICE file, if a future version adds one), and state in modified files that you changed them. You may not use the S.T.A.R. name to endorse your product.

3. What it needs at run time

Nothing beyond the Python standard library: it works offline.

4. Integrity

SHA-256 fingerprints of the files published on this website. Check a downloaded file with:

```
python -c "import hashlib,sys;print(hashlib.sha256(open(sys.argv[1],'rb').read()).hexdigest())" star_geodesy-0.1.1-py3-none-any.whl
```

FILE	SHA-256
star_geodesy-0.1.1-py3-none-any.whl	7e5ec875704229be41604233c74a5835ec9a3c57354183ef0dfa91a00a75fc83
star_geodesy.py	b64fb8d6cbe9e2df7fec7f89298e3ffe4534e3ae5960dc4d050a1584739261b4
star_geodesy-0.1.1-source.zip	7f734bb140deca411168a25539316213ff97a05d5b41ab34c584b82fda60bd4d

5. What it does, and its limits

WGS-84 geodetic coordinates to and from ECEF. Standard library only.

Other datums, geoid heights, geodesic distances (see XC-003), any flight use.

- `geodetic_to_ecef(lat_deg, lon_deg, h_m)` → `(x, y, z)` in metres (WGS-84, NIMA TR8350.2 constants).
- `ecef_to_geodetic(x, y, z)` → `(lat_deg, lon_deg, h_m)`, iterative to 1e-14 rad at ANY altitude; RuntimeError if it does not converge; the forward transform of the result closes to < 1 micrometre.
- Invalid input raises `ValueError` (|lat| > 90, Earth's centre).

6. Export, use and certification

The package is published and freely available. That usually takes software out of export-control lists, but not every use of it: read the page on space activities and export control before using it in a controlled programme. It is not certified or qualified for flight; the evidence describes what was tested and how.

7. Citation and bill of materials

```
@software{cavazzini_star_geodesy_0_1_1,
  author  = {Cavazzini, Andrea},
  title   = {{star-geodesy}: WGS-84 geodetic to/from ECEF with exact inversion at any
altitude},
```

```
  version = {0.1.1},
  year    = {2026},
  url     = {https://andrea07072000.github.io/S.T.A.R.-/software/star_geodesy/},
  note    = {Apache-2.0. Source: https://github.com/Andrea07072000/S.T.A.R.-, commit dc09f61}
}
```
